

Project Management and Engineering

End-to-End Engineering Solutions

Point Eng Ltd delivers comprehensive design-to-installation services for marine, offshore, and industrial applications. From initial concept development to final commissioning, our team integrates technical expertise with hands-on experience to ensure every project meets performance, safety, and compliance standards. Whether it's watertight doors, fire-rated doors, hatches, or bespoke mechanical systems, we manage the full lifecycle with precision and accountability.

Built for Performance, Tested for Assurance

Our in-house manufacturing capabilities are backed by rigorous testing protocols that verify structural integrity, sealing performance, and regulatory compliance. We simulate real-world conditions to validate durability and functionality before deployment. This ensures that every product, whether standard or custom, is ready to perform in demanding environments. Clients benefit from reduced risk, faster turnaround, and full traceability from design through to installation.

Seamless Installation and Support

Point Eng Ltd's installation services are carried out by experienced technicians who understand the operational realities of marine and industrial sites. We coordinate closely with client teams to minimize downtime and ensure smooth integration with existing systems. Post-installation support includes documentation, training, and maintenance guidance, reinforcing our commitment to long-term reliability and client satisfaction.

Design - Build - Test - Install
